pro100gt@gmail.com

apokhylenko.github.io/

QUALIFICATION

Building web applications using Python and Django framework.

Main technology stack:

- – Python
- – Django

Additional skills:

- – JS
- – HTML
- – CSS
- – Git

EDUCATION

I. I. Mechnikova Odessa National University
International economic relations
2011 – 2015

Studying there gave me a lot but most important it gave me understanding of whom I want to become.

PROJECTS

Open source project — *tkr.od.ua*

Technologies:
Back-end: Django
Front-end: Jquery, Bootstrap
My role:
-bug fixing
-implementing new features
-code cleanup

I was fixing bugs such as eternal account activation link, refactoring code and implementing new features, e.g. logging in without page reloading using Jquery and Ajax.

Open source project — *apokhylenko.github.io*

This is static portfolio website which combines the qualities of a modern application and still as simple as "2+2".
It is lightweight, it is responsive, it is progressive (PWA)!

Technologies:
Back-end: –
Front-end: CSS, HTML, JS, PureCSS modules

INTERESTS

I am **highly** motivated in becoming professional web programmer. I know it's not easy and that it needs a lot of hard work. I chose this way and I will not deviate from the intended path.

LANGUAGES

English, Russian, Ukrainian.
